INCRETE COLOR-CRETE

A SPECTRUM OF COLOR FOR NEW CONCRETE

DESIGN FREEDOM TO CREATE COLORFUL HARDSCAPES

Increte Color-Crete is ideal for projects of any size or scope, residential or commercial, and is versatile enough either to blend with the surrounding environment or to add stunning highlights to hardscape designs. Increte Color-Crete is a mix-in, integral colorant and not a topping, which means the color is permanent for the life of the concrete. Stamped, broomed, troweled, sand-blasted and exposed aggregate are several finishing techniques that can transform the look of Increte Color-Crete concrete. With 35 standard colors and an unlimited palette of custom colors available, Increte Color-Crete is the decorative product of choice for flat work, vertical pours and pre-cast applications.

Increte Color-Crete integral color transforms plain concrete into a workable artistic material that can match or highlight any theme or decor. There is the freedom to add pizzazz, design and color shades to what has been considered plain and bland, or the concrete can be colored to blend or match the surrounding environment.

Ideal for: Patios | Driveways | Walkways | Entryways | Plazas | Parks
