

EUCLID CHEMICAL

Proven. Concrete. Solutions.

EUCLID CHEMICAL

For over a century, The Euclid Chemical Company has supplied the global building industry with specialty products and technical support for the concrete and masonry construction markets. As pioneers in establishing industry best practices, Euclid Chemical manufactures hundreds of chemical admixture and construction products, while developing and promoting new technologies such as fiber reinforcement, integral color, cathodic protection and advanced concrete repair materials.

In addition to offering premium products, we provide industry leadership, a commitment to research, training programs, and design and installation consultation.

The **PROMISE**

We Keep

Euclid Chemical has built its reputation on putting people first. We recognize that our customers are vital partners in our mission to be world leaders in the concrete and masonry construction industries.

The **INDUSTRY**

We Support

Concrete is used more than any other man-made material in the world. In fact, it's the world's second most consumed substance, second only to water. From new construction projects to rehabilitation, and from strengthening to decorating, Euclid Chemical works with owners, contractors, concrete producers, specifiers, and engineers. We deliver quality products and services to improve concrete and provide sustainable solutions that make concrete last longer, look better, and remain the economical building material of choice.

Approximately
5 Billion
cubic yards
of concrete
are produced
each year

The industry
accounts for
\$40
Billion
annually

Worldwide, over
50 Million
employees
work in concrete
construction

2X
more
concrete is used
in construction
around the world
than the total of all
other building materials combined.

70⁺%
of the world's
population lives
in structures that
contain concrete

The **MARKETS**

We Serve

Euclid Chemical products are the preferred choice of professionals in the following concrete construction marketplaces:

- Industrial
- Commercial
- Institutional
- Residential
- Infrastructure
- Transportation
- Mining and Tunneling
- Decorative Concrete

The **LEADERS**

We Employ

Civil Engineers. Geologists. Organic Chemists. Chemical Engineers. These are just some of the technical leaders of Euclid Chemical. Our employees serve on some of the biggest and most influential industry committees in construction, including *The American Concrete Institute*, *The American Society of Concrete Contractors*, *The International Concrete Repair Institute*, and *The National Ready Mixed Concrete Association*.

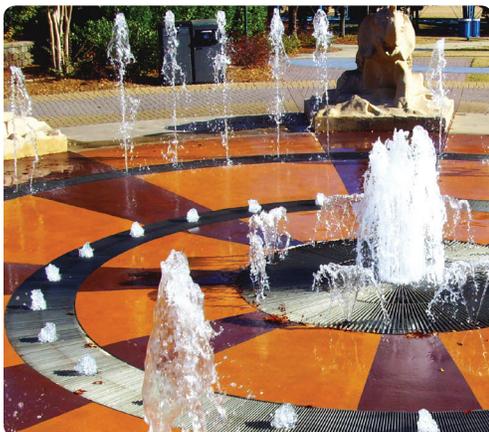

Our work with these organizations underscores the value we place on community, shared knowledge and promoting best practices. These deep industry roots help guide us in consistently producing new technological and scientific advancements.

The **PRODUCTS**

We Deliver

Euclid Chemical products span all concrete and masonry markets.

- Chemical Admixtures
- Fiber Reinforcement
- Concrete Construction Products
- Concrete Repair Products
- Decorative Concrete Systems
- Mining and Tunneling Products

The **STYLE**

We Promote

Our Increte product line offers a variety of decorative systems and tools for new construction and the renovation of existing surfaces. Integral color and topical treatment systems that reproduce natural and artistic patterns (as well as logos) can transform concrete with stunning results.

The **SCIENCE**

We Develop

Euclid Chemical's Technical Center in Cleveland, Ohio, is a state-of-the-art science facility, and is the heart of our main campus. In addition to formulating innovative products, we welcome customers to our laboratories, where we conduct physical testing, mixture design optimization, forensic analysis, and petrographic evaluations. Our Marketing and Technical teams collaborate to provide leading-edge products, services, and technical support to our customers. The Technical Center works hand-in-hand with these customers to solve their job-specific problems.

The **GLOBAL FOOTPRINT**

We Manage

Euclid Chemical oversees manufacturing facilities, warehouses, dispensing plants and sales offices across the world. This strategy helps optimize raw material management, product production, and delivery functions to best serve our customers.

The Euclid Chemical global footprint includes:

- 1,200+ employees
- 40+ facilities
- 1,800+ distributors
- 13 countries

The **SUPPORT**

We Provide

We support customer needs from project planning through material application. Our responsive sales and customer service representatives, field technicians, and business development professionals offer assistance in product specification, selection, delivery and installation.

Trade **ASSOCIATIONS** and **COUNCILS**

Euclid Chemical is proud to support and serve the following organizations in further developing the concrete construction industry. We actively participate in additional local trade organizations and councils, promoting best practices.
