- Architectural concrete
- Precast concrete
- Increte Spray-Deck

### PRODUCT SUPPORT

- Specification assistance
- CAD details
- Design consultation
- Color selection assistance
- R&D laboratories
- Applied samples
- Engineered-systems approach

**INCRETE RENOVATE** can be used for restoring old, worn, stamped concrete, to change the color of concrete, to mask repairs, or to renovate any slab concrete surface. **INCRETE RENOVATE** is an easy-to-use two part polymer-modified cementitious micro-topping that is easily applied using only a paint roller or a pump-up hand sprayer. **INCRETE RENOVATE** can be integrally colored with **INCRETE COLOR PACKS** or it can be stained with a variety of stains. For stamped concrete, this ultra thin coating retains the original texture and pattern, and a secondary highlight colorant **INCRETE ANTIQUING AGENT** may be used. This tough, durable wear-bearing surface is stain resistant and easy to clean.

### CUSTOMER SUPPORT

- **Technical Support** – Available for product selection and application questions.
- **Product Assistance** – Locate a contractor or distributor. Support literature and in-depth written application instructions.
- **Field Specialists** – Trained field specialists provide consultations and recommendations.
- **Design Consultation** – Complete with showroom and training facility.
- **Seminars** – 2-day seminars include classroom instruction on project estimation and marketing and sales tactics to grow your business all year long with hands-on product training (also available in Spanish). On-site distributor training and webinars by request are also available.
- **Trade shows** – Industry events, expos and conferences offering industry-related instruction.
